***********************Doggy Filter*************************
************************************************************
```

Hello,
      The Dog Filter has a special effect that allows users to
place it on the dog's nose, ears over their faces when taking
photo. It is also made for people to see the special effects on
their face.This project is designed to make people happy.

```
------------------------------------------------------------
                  What is Requirement ?
------------------------------------------------------------
```
